Microsoft
EXAM 70-323
Administering Office 365

Total Questions: 55

Exam A

QUESTION 1
DRAG DROP
You are the administrator for a company named Contoso, Ltd. Contoso has a subscription to Office 365 for midsize business and enterprises and has 200 Microsoft Lync Online users. Contoso works with a partner company named Fabrikam, Inc. All users at Fabrikam use Windows live. You need to implement desktop sharing between all of the Contoso users and all of the Fabrikam users, except for the users in the Contoso finance department. The Contoso users must be prevented from using Lync Online to communicate with any other external users. What should you do? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A.

Correct Answer:
Section: (none)
Explanation

QUESTION 2
Your company has a main office and a branch office. Both offices are directly connected to the Internet. The
branch office connection to the Internet has limited bandwidth. The company deploys Microsoft Lync Online.
You need to ensure that users in the branch office can only use instant messaging (IM) while using Lync
Online. The users must be prevented from connecting to audio or video conferences. What should you do?

A. On the firewall at the branch office, block all of the outbound traffic on port 5061.
B. From the Office 365 portal, modify the user properties of each user in the branch office.
C. From the Office 365 portal, configure the license settings of each user in the branch office.
D. Deploy only the Lync 2010 Attendee client to all of the users in the branch office.

Correct Answer: B

QUESTION 4

http://www.gratisexam.com/

DRAG DROP
Your company has an Office 365 subscription. The company updates the email security policy to include the
following requirements:

· All email messages older than two years must be deleted automatically unless a user chooses to retain the message for a longer period.
· All email messages sent to and from a distribution group named Legal must be stored in a single mailbox for five years.
· All email messages sent to the Internet from the company must contain a disclaimer. You need to configure Office 365 to meet the security policy requirements. Which features should you configure? To answer, drag the appropriate feature to the correct requirement m the answer area.

Features

- a journal rule
- a litigation hold
- a retention policy
- a transport rule
- delivery reports

Answer Area

Feature	All email messages older t... be deleted automatically u... chooses to retain the mess... period.
Feature	All email messages sent to distribution group named Le... in a single mailbox for five y...
Feature	All email messages sent to the company must contain a...

A.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

Features

- (blank)
- a litigation hold

QUESTION 6
You are the administrator for a company named Tailspin Toys. The company uses the tailspintoys.com SMTP
domain. All mailboxes are hosted on Office 365. From the Internet, customers send warranty questions to
Tailspin Toys by sending an email message to a shared mailbox named Warranty. The Warranty mailbox has
the warranty@tailspintoys.com SMTP address. The service manager reports that many email orders sent to
warranty@tailspintoys.com are identified as spam. You need to ensure that all of the messages sent by the
customers arrive in the Warranty mailbox. What should you do?

A. From the Forefront Online Protection Administration Center, enable Directory-Based Edge Blocking.
B. From the Forefront Online Protection Administration Center, create a new policy rule.
C. From Windows PowerShell, run the New TransportRule cmdlet and specify the -
    exceptifheadercontainswords parameter.
D. From Windows PowerShell, run the Set-ContentFilterConfig cmdlet and specify the - bypassedrecipients
    parameter.

Correct Answer: D

QUESTION 7
HOTSPOT

You are implementing a hybrid deployment of Office 365. You discover that users who have migrated to Office
365 cannot view the free/busy information of users who are hosted on the Microsoft Exchange Server on-
premises environment. The Exchange on-premises users can view the free/busy information of all users. You
need to ensure that the users who have Office 365 mailboxes can view the free/busy information of users who
have Exchange on premises mailboxes. Which node should you modify from the Exchange Management
Console? To answer, select the appropriate node in the answer area.

A.

QUESTION 11
Your company has a hybrid deployment of Office 365. You need to create a group. The group must have the following characteristics:
· Group properties are synchronized automatically.
· Group members have the ability to control which users can send email messages to the group.
What should you do?

A. Create a distribution group and configure the Mail Flow Settings.
B. Create a dynamic distribution group.
C. Create a new role group.
D. Create a distribution group and configure the Membership Approval settings.

Correct Answer: A
Section: (none)

Explanation

QUESTION 12
Your company has a hybrid deployment of Office 365. You need to verify whether free/busy information sharing with external users is configured. Which Windows PowerShell cmdlet should you use?

A. Test-OutlookConnectivity
B. Test-FederationTrust
C. Get-OrganizationRelationship
D. Get-MSOLDomainFederationSettings

Correct Answer: C
Section: (none)
Explanation

QUESTION 13
Your company has an Office 365 subscription. A user named User1 has a mailbox. You need to ensure that all of the email messages sent and received by User1 are accessible to the audit department for 60 days, even if User1 permanently deletes the messages. What should you do?

A. Run the Set-MailboxDatabase cmdlet and specify the deleteditemretention parameter.
B. Run the Set-Mailbox cmdlet and specify the litigationholdenabled parameter.
C. Run the Set-Mailbox cmdlet and specify the singleitemrecoveryenabled parameter.
D. Run the Set-MailboxDatabase cmdlet and specify the eventhistoryretentionperiod parameter.

Correct Answer: B
Section: (none)
Explanation

QUESTION 14
Your company has a Microsoft Exchange Server 2003 organization. Users access their mailbox by using RPC over HTTP and Exchange ActiveSync. You purchase an Office 365 subscription. From the Office 365 portal, you create and verify the accepted domain of the company. From the Exchange Control Panel, you attempt to migrate all of the mailboxes to Microsoft Exchange Online and you receive an error message indicating that the remote server is unavailable. You need to identify what prevents the mailboxes from migrating. Which tool should you use?

A. the Microsoft Remote Connectivity Analyzer
B. the Exchange Server Deployment Assistant

C. the Office 365 Deployment Readiness Tool
D. the Microsoft Online Services Directory Synchronization Configuration Wizard

QUESTION 17
This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all. Your company has an intranet site that is hosted on Microsoft SharePoint Online. Users frequently create shortcuts to documents stored in the intranet site. The users report

that when they rename a document, the shortcut to the document becomes invalid. You need to ensure that when a user renames a document, the link to the document remains valid. Which feature should you use?

A. SharePoint Server Enterprise Site Collection Features
B. Microsoft Office Web Apps
C. Metadata Navigation and Filtering
D. document ID
E. in-place record management
F. Reporting
G. Content Organizer
H. Workflows
I. SharePoint Server Publishing Infrastructure
J. Document Sets
K. Library and Folder Based Retention
L. Content Type Syndication Hub

Correct Answer: D
Section: (none)

QUESTION 23
DRAG DROP
You deploy Microsoft SharePoint Online. The deployment contains one site collection. You are assigned to the help desk. You see the following open cases:
· A user named User1 deleted a site from the site collection. · A user named User2 deleted a custom Web Part page from a site. · A user named User3 deleted an announcement list from the Recycle Bin. You need to recommend a method to recover the content deleted by each user. The solution must recover the content in the minimum amount of time. Which methods should you recommend?

To answer, drag the appropriate method to the correct user in the answer area.

Methods	Answer Area	
Open a service request.	Method	User1
Run **stsadm.exe** and specify the *restore* operation.	Method	User2
Instruct the user to restore the content from the Recycle Bin.	Method	User3
Instruct a site collection administrator to restore the content from the Recycle Bin.		

A.

QUESTION 32
HOTSPOT

Your company has a site that is hosted on Microsoft SharePoint Online. You have a custom term set in the term
store. You create a Shared Documents library named Docs. You need to ensure that users can classify the
documents in Docs by using the term set. Which type of column should you add to the library? To answer,
select the appropriate column in the answer area.

Column name:

The type of information in this column is:

○ Single line of text
○ Multiple lines of text
○ Choice (menu to choose from)
○ Number (1, 1.0, 100)
○ Currency ($, ¥, €)
○ Date and Time
○ Lookup (information already on this site)
○ Yes/No (check box)
○ Person or Group
○ Hyperlink or Picture
○ Calculated (calculation based on other columns)
○ Full HTML content with formatting and constraints for publishing
○ Image with formatting and constraints for publishing
○ Hyperlink with formatting and constraints for publishing
○ Summary Links data
○ Rich media data for publishing
○ Managed Metadata

A.

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

Column name:

The type of information in this column is:
- ● Single line of text
- ○ Multiple lines of text
- ○ Choice (menu to choose from)
- ○ Number (1, 1.0, 100)
- ○ Currency ($, ¥, €)
- ○ Date and Time
- ○ Lookup (information already on this site)
- ○ Yes/No (check box)
- ○ Person or Group
- ○ Hyperlink or Picture
- ○ Calculated (calculation based on other columns)
- ○ Full HTML content with formatting and constraints for publishing
- ○ Image with formatting and constraints for publishing
- ○ Hyperlink with formatting and constraints for publishing
- ○ Summary Links data
- ○ Rich media data for publishing
- ○ Managed Metadata

Explanation:
Select "Managed Metadata"

QUESTION 34
This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all. Your organization owns and operates two separate companies named Tailspin Toys and Wingtip Toys. The company has one Office 365 subscription. All users at Wingtip Toys have an email address that uses the wingtiptoys.com suffix. All users at Tailspin Toys have an email address that uses the tailspintoys.com suffix. The business units have the following configurations:
The email infrastructure of Wingtip Toys is hosted entirely on Office 365. The email Infrastructure of Tailspin Toys is a hybrid deployment of Office 365 that uses single sign- on.
The Tailspin Toys network contains three servers. The servers are configured as shown in the following table.

Server name	Server role
Server1	Microsoft Exchange Server 2010 Service Pack 1 (SP1)
Server2	Active Directory Federation Services (AD FS) 2.0
Server3	Directory synchronization

You delete a Tailspin Toys user. You need to ensure that the deleted user's name is removed from the global address list (GAL) as soon as possible. Which cmdlet should you use?

A. Convert-MSOLDomainToStandard
B. Add-Member
C. Set-MSOLUserPassword
D. Set-MSOLGroup
E. Update-MSOLFederatedDomain
F. Set-MSOLDomainFederationSettings
G. Start-OnlineCoexistenceSynch
H. New-MSOLLicenseOptions
I. Set-MSOLDirSyncEnabled
J. Start- Job
K. Confirm-MSOLDomain
L. Set-MSOLUser
M. Set-MSOLUserPrincipalName
N. Add-MSOLGroupMember
O. Set-MSOLDomainAuthentication

Correct Answer: G

QUESTION 36
This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all. Your company has two separate business units named A . Datum Corporation and Contoso, Ltd. The company has one Office 365 subscription. All users at Contoso have an email address that uses the contoso.com suffix. All users at A. Datum have an email address that uses the adatum.com suffix. The business units have the following configurations:
· The email infrastructure of Contoso is hosted entirely on Office 365. · The email infrastructure of A. Datum is a

hybrid deployment of Office 365 that uses single sign-on. The A . Datum network contains three servers. The servers are configured as shown in the following table.

Server name	Server role
Server1	Microsoft Exchange Server 2010 Service Pack 1 (SP1)
Server2	Active Directory Federation Services (AD FS) 2.0
Server3	Directory synchronization

You install a new certificate on Server1 and Server2. You need to ensure that the A. Datum users continue to use single sign-on.
Which cmdlet should you use?

A. Start-OnlineCoexistenceSynch
B. Set-MSOLDirSyncEnabled
C. New-MSOLLicenseOptions
D. Start-Job
E. Convert-MSOLDomamToStandard
F. Set-MSOLDomainAuthentication
G. Set-MSOLUserPrincipalName
H. Set-MSOLUserPassword
I. Add-MSOLGroupMember
J. Confirm-MSOLDomain
K. Update-MSOLFederatedDomain
L. Set MSOLGroup
M. Set-MSOLDomainFederationSettings
N. Add-Member
O. Set-MSOLUser
